

We didn't invent training. We invented training solutions.

CompuTrain's Automated Customize Training

What is ACT? Automated Customized Training is a computer based training solution created to reduce training costs while increasing training activities and results. The perfect example of ACT is this CD that you are viewing. Think of this as your own training program.

Here is the typical problem and the perfect solution; "We have a computer program that we need to train our employees on (especially our new employees) and teach them how to use it, but we can't afford to have a trainer. What would you recommend?"

We have the perfect solution for you. Let us create an Automated Customized Training for you. By using the state-of-the-art video capturing software and devices, we present all of your training into a video format packed onto a portable CD or DVD. We incorporate your training onto the CD and you never have to train again. Everything is now at your fingertips with a computer interactive training which includes a menu and index of topics for the user to pick and choose on the navigation features such as Pause, Stop and Forward. Furthermore, your ACT is designed to allow user(s)/trainee(s) to interact with your computer application system....delivering the concept of "applied learning".

Here are a few advantages of an ACT:

- n Learn what you want
- n Learn when you want
- n Learn where you want
- n Cost saving up to 90%
- n Uniformity of content
- n Learner controlled
- n 100% learning retention

Your company now has a "trainer" that will be there anytime and anywhere you need it. Your employee can take the "trainer" home and insert the CD into his or her computer and let the training begin.

If you have any doubt of the cost savings and benefits of our ACT solution, we'd love to prove it to you. All we ask is for you give us an opportunity to demonstrate our product and do a cost-benefit-analysis for you free of charge.

If you just want find out more about our ACT solution, please contact us and we will be glad to provide you more information. info@computrainsolutions.com Thank you.
